Component

```
function PokemonCard({ number = 0 }) {
  const pokemons = useContext(PokemonContext);
  const { name, imageSource } = pokemons[number];

  return (
    <>
      <p>{ name }</p>
      <img src={ imageSource } />
    </>
  );
}
```

Component

Function or class with a *render()* method that inherits from *React.Component*.
